1 Parallel volume ray-casting for unstructured-grid data on distributed-memory architectures
Kwan-Liu Ma
December 1995 **Proceedings of the IEEE symposium on Parallel rendering**
Publisher: ACM Press
Full text available: pdf(8.60 MB) Additional Information: full citation, citings, index terms

2 A simple model of ocean waves
Alain Fournier, William T. Reeves
August 1986 **ACM SIGGRAPH Computer Graphics , Proceedings of the 13th annual conference on Computer graphics and interactive techniques SIGGRAPH '86**, Volume 20 Issue 4
Publisher: ACM Press
Full text available: pdf(4.11 MB) Additional Information: full citation, abstract, references, citings, index terms

We present a simple model for the surface of the ocean, suitable for the modeling and rendering of most common waves where the disturbing force is from the wind and the restoring force from gravity.It is based on the Gerstner, or Rankine, model where particles of water describe circular or elliptical stationary orbits. The model can easily produce realistic waves shapes which are varied according to the parameters of the orbits. The surface of the ocean floor affects the refraction and the break ...

3 Visualization of scalar topology for structural enhancement
C. L. Bajaj, V. Pascucci, D. R. Schikore
October 1998 **Proceedings of the conference on Visualization '98**
Publisher: IEEE Computer Society Press
Full text available: pdf(1.14 MB) Additional Information: full citation, references, citings, index terms
Publisher Site

Keywords: curves and surfaces, scalar fields, scientific visualization, vector topology
